PROPOSAL FOR

HELLO TEAM WORKFORCE HUB PLATFORM

PREPARED FOR: THE HELLO TEAM

PREPARED BY: Dev Thakkar	ISSUED ON: 18.12.2025
AUTHORIZED BY: Kiran Patel	VALID TILL: 23.12.2025

Greetings.

Thank you for considering Web 3.0 India for your project needs. We are genuinely excited about the opportunity to collaborate with you and bring your vision to life.

Having carefully reviewed Hello Team Workforce Hub platform requirements, our team has diligently crafted a solution that aligns seamlessly with your needs. We believe our expertise and commitment to excellence will ensure the success of your project.

Enclosed you will find a detailed Proposal outlining the specifications of the project and the terms of our agreement. The proposed contract follows a fixed-price model, with costs pre-determined and divided into manageable milestones for clarity and transparency.

We value open communication and collaboration, and we are committed to addressing any questions or modifications you may have. Following the submission of this Proposal, I would be eager to connect with you to discuss any further details or concerns you may wish to explore.

Thank you once again for considering Web 3.0 India for your project. We look forward to the possibility of working together and delivering exceptional results.

Sincerely,
Web 3.0 India
A Unit of Virtual Height IT Services Pvt. Ltd.

PROJECT UNDERSTANDING

The **Hello Team Workforce Platform** is designed as a centralized operational platform to manage remote workforce activity, client approvals, payroll preparation, monitoring integrations, and employee engagement within a single, fully branded environment owned by Hello Team. The objective of the platform is to replace fragmented tools, manual coordination, and approval gaps with a structured system that delivers clarity, accountability, and operational consistency while preserving a supportive and organized experience for employees.

The solution is built around three interconnected portals **Employee Workspace**, **Client Oversight Console**, and **Hello Team Operations Panel**. Each portal serves a distinct function while remaining tightly connected through shared data, approval flows, and governance rules. Employees operate within a guided virtual workspace that clearly communicates schedules, work expectations, availability options, and access to internal support. Clients receive real-time workforce visibility, approval-driven controls for work time and additional hours, proactive alerts, and billing readiness transparency. Hello Team maintains centralized authority to enforce policies, manage exceptions, audit activity, and ensure operational accuracy across the system.

The platform is intended to balance productivity oversight with human-centered design. Every action from starting a work session to final payroll preparation is recorded, traceable, and governed by predefined rules and approval checkpoints. The system is designed to be scalable, secure, and enterprise-ready, supporting trust between employees, clients, and Hello Team through transparency, consistency, and disciplined workflow execution.

Platform Structure

The Workforce Platform is organized into three closely aligned environments:

1. **Employee Workspace** – Supportive, structured, people-focused
2. **Client Oversight Console** – Clear, approval-driven, authoritative
3. **Operations Panel** – Controlled, auditable, policy-managed

Each environment functions independently while remaining connected through shared workflows, approvals, and system controls.

TECHNICAL SPECIFICATIONS & TEAM INVOLVEMENT

Within this section, we outline the technical specifications that will serve as the foundation for the development of the platform, ensuring its seamless integration, functionality, and security.

Module	Technology
Design	Figma or XD
Frontend	React JS
Backend	Node JS
Database	MongoDB
Server	Aws cloud or relevant

Our multidisciplinary team comprises skilled professionals across various domains. Team members will be assigned to cross-functional roles, fostering a collaborative environment where expertise is leveraged efficiently.

1	Project Manager
2	Business Analyst
3	UI/UX Designer
4	Frontend Developer
5	Backend Developer
6	Quality Analyst
7	DevOps Engineer

WORKING METHODOLOGY

Our development approach is a dynamic framework that enables iterative and collaborative development, ensuring adaptability and responsiveness to evolving requirements.

1. Project Discovery
2. Project Kick-Off Call
3. Sprint Planning for the Project
4. User Stories Creation
5. Wire-framing and UI/UX
6. Development Stage (Milestone Based)
7. QA Stage and Bug Fixing
8. Sprint Demo and Delivery
9. Milestone Demo and Delivery
10. Final UAT
11. Deployment and Go Live
12. Training and Support

SCOPE OF WORK

CLIENT SIDE PORTAL

Visibility, Approval & Workforce Control

- The **Client Oversight Console** provides clients with real-time insight and structured control over their assigned workforce.
- It is designed to ensure transparency, timely approvals, and billing readiness without manual follow-ups.

Client Access & Login

- Secure client login environment
- Password recovery functionality
- Role-based access within the client organization (if applicable)
- Session timeout and security enforcement
- Compatible across desktop and modern devices

Upon login, clients are directed to their **dashboard overview**.

Client Dashboard

- The dashboard provides immediate visibility into:
    - All employees assigned to the client
    - Employees currently in active work sessions
    - Session start times
    - Live work duration for the current day
    - Items requiring action (approvals, requests, payroll alerts)

Live Workforce View

- Clients can access a real-time workforce view displaying:
    - Employee name and profile photo
    - Current work status (working, on break, logged out)
    - Session start time
    - Live active duration
    - Monitoring indicators from Teramind (active, idle, offline)

    - Direct access to detailed monitoring within Teramind

Work Time Review & Confirmation

- Clients are able to:
    - Review daily and weekly work records
    - Approve or decline submitted time entries
    - Modify entries with mandatory justification
    - Review and approve adjustments made by Hello Team
    - Approve or reject additional work requests
    - Approve previously unconfirmed work time
- This ensures payroll and billing accuracy.

Alerts & Notifications

- The system proactively notifies clients of:
    - Pending work confirmations
    - Additional work requests awaiting approval
    - Unconfirmed hours approaching payroll cut-off
    - Payroll deadline reminders
    - Pending manual adjustments
- Alerts remain visible until action is taken.

Monitoring Visibility (Teramind Integration)

- Clients can view:
    - Productivity summaries
    - Activity timelines
    - Screenshots (where enabled)
    - Online and offline patterns
    - Direct links to detailed employee views within Teramind

Billing & Payment Review

- Clients can manage billing-related items including:
    - Invoice history
    - PDF invoice downloads
    - Approved work summary downloads
    - Payment history

WEB3.INDIA™

  - Securely stored payment methods
  - Automatic weekly billing based on approved work
  - Approval of bonuses or rate adjustments

QuickBooks Desktop (On-Premise):

- Invoices can be pushed to QuickBooks **or**
- Generated internally, with QuickBooks used for accounting records only

EMPLOYEE SIDE PORTAL

Digital Work Environment for Remote Employees

The **Employee Workspace** is designed as a structured digital office that supports daily work routines, clarity of expectations, and easy access to internal support.
It is not limited to attendance tracking but serves as the employee's primary interaction point with Hello Team throughout the workday.

From login onward, the system clearly communicates:

- Work expectations and assigned schedules
- Current system time and work status
- Required actions for the day
- Availability of internal assistance

Employee Access & Authentication

- Secure login using assigned employee credentials
- Password reset and recovery functionality
- Session controls to prevent unauthorized or parallel logins
- Automatic logout after a defined period of inactivity
- Optimized for desktop usage with modern browsers
- Upon successful login, employees are taken directly to their **daily work overview**.

Work Session Start & End (Clock In / Clock Out)

(Employees initiate and conclude their work sessions directly within the platform.)

- **Session Start Interface Displays**
  - Current system time

    - Assigned shift details for the day
    - Arrival status indicator (early, on time, delayed)
    - Primary action button to start or end the session
- **During an Active Session**
    - Live counter showing total active work time
    - Break duration tracking (where applicable)
    - Clear indication of current work status
- Optional branded confirmations (visual or audio) provide positive feedback when sessions start or end.

Schedule Visibility

- Employees have continuous access to their schedules, including:
    - Current day schedule
    - Weekly schedule overview
    - Upcoming schedule changes
    - Automatic notifications when schedules are updated
- This ensures alignment with client expectations and reduces confusion.

Availability & Leave Requests

(Availability and leave options are governed by **client-specific policies** and enforced by the system.)

- **Unpaid Availability Requests** (Some clients may offer unpaid time requests only.)
    - Employees see only options enabled by their assigned client
    - Standard notice expectation of two weeks
    - Requests submitted with shorter notice remain allowed but are flagged with a system message
    - Approval flow:
      Employee → Client → Hello Team

Paid Leave Requests (Where Applicable)

- Paid leave entitlements vary by client and may include:
    - Fixed annual allocations
    - Accrued entitlements over time
    - Milestone-based eligibility
    - No paid leave entitlement

- **System Controls Include:**
  - Automatic tracking of available balance
  - Prevention of requests exceeding entitlement
  - Clear display of remaining balance
  - Allowance for short-notice requests with advisory messaging

Work Records & Time History

- Employees can review a transparent record of their work activity, including:
  - Complete history of logged work sessions
  - Approved work hours
  - Approved additional work time
  - Adjusted or rejected entries with visible explanations
  - Optional summarized view for payroll reference
- This transparency helps build trust and minimizes disputes.

Employee Support & Internal Communication

- Employees can privately communicate with Hello Team through:
  - Support request submissions
  - Direct internal messaging
  - Meeting or call requests
  - Secure document uploads
  - Follow-up communications
- All communication in this section is **strictly private** and not visible to clients.

Engagement & Wellbeing Check-Ins

- To promote engagement and emotional connection, the workspace includes:
  - Optional daily wellbeing status check
  - Short comments or feedback entries
  - Encouraging system messages
  - Internal announcements from Hello Team
- These features help reinforce a supportive virtual workplace culture.

WEB3.INDIA™

ADMIN & MANAGEMENT PORTAL

Admin Access & Security

- **Administrative Login**
  - Secure admin login with credential-based authentication
  - Completely separate admin environment from employee and client portals
  - Password recovery and session timeout controls
- **Role-Based Access Control**
  - Ability to define multiple admin roles (e.g., Super Admin, Operations, HR, Finance, Support)
  - Permissions controlled per role, including:
    - View-only access
    - Edit permissions
    - Approval authority
    - Override capabilities
- This ensures each internal team member only accesses what they are authorized to manage.

Operations Dashboard (System-Wide Overview)

Upon login, administrators are presented with a **global operational dashboard** that provides real-time insight into platform activity.

- The dashboard includes:
  - Total active employees
  - Total active clients
  - Employees currently in active work sessions
  - Pending time approvals across all clients
  - Outstanding availability and leave requests
  - Pending additional work (overtime) requests
  - Payroll readiness indicators
  - Open employee support tickets
  - Alerts requiring immediate attention
- This dashboard functions as the **daily command center** for Hello Team operations.

Employee Administration

Admins can access detailed employee profiles and manage workforce assignments.

- Capabilities include:
  - Viewing complete employee profiles
  - Assigning or reassigning employees to clients
  - Reviewing employee schedules
  - Viewing historical work patterns and attendance trends
  - Reviewing approved and declined work time
  - Monitoring additional work history
  - Viewing employee wellbeing check-ins (internal visibility only)
  - Activating or deactivating employee access when required
- Admins maintain full visibility while respecting approval workflows.

Client Administration

(Admins can manage all client-related configurations and activity.)

- This includes:
  - Creating and maintaining client accounts
  - Assigning employees to specific clients
  - Defining client-specific operational rules
  - Configuring availability, leave, and additional work policies
  - Reviewing client approval behavior (pending, delayed, completed)
  - Monitoring payroll readiness per client
  - Triggering reminders or escalation alerts
- This ensures consistent enforcement of client agreements.

Time Record Adjustments & Corrections

(Admins are authorized to perform controlled corrections to work records when necessary.)

- Supported actions include:
  - Adding or removing work hours
  - Adjusting session start and end times
  - Splitting work sessions
  - Marking time as non-working
  - Applying paid or unpaid leave manually
- **Governance & Controls**
  - Mandatory notes required for every adjustment

WEB3INDIA™

    - Original entries remain visible for audit purposes
    - All changes are automatically routed to the client for confirmation
    - Adjusted time does not affect payroll or billing until approved
- This protects both Hello Team and the client from disputes.

Availability & Leave Policy Management

(Admins can define and manage availability and leave rules on a per-client basis.)

- Capabilities include:
    - Enabling or disabling paid leave options
    - Configuring unpaid availability-only clients
    - Defining accrual or allocation logic
    - Setting fixed, milestone-based, or time-based eligibility
    - Manually adjusting balances when required
    - Reviewing historical usage per employee
- All rules are enforced automatically across employee and client views.

Additional Work (Overtime) Oversight

(Admins have a centralized view of all additional work activity.)

- This includes:
    - Pending additional work requests
    - Client-approved additional work
    - Client-rejected additional work
    - Approved but unbilled additional work
    - Unapproved work that may impact payroll
- Admins can intervene where necessary to ensure correct handling and billing.

Payroll Readiness & Validation

(The Operations Panel provides tools to ensure payroll accuracy before processing.)

- Admins can:
    - Review payroll-ready hours per client
    - Identify unapproved or disputed work time
    - Trigger payroll cut-off reminders
    - Override payroll dates when necessary
    - Confirm which hours will be included in payroll

    - Prevent unapproved time from being processed
- This ensures payroll is based only on validated data.

Billing & Invoice Administration

(Admins manage billing preparation and invoice generation.)

- Capabilities include:
    - Generating invoices based on approved work time
    - Applying bonuses, adjustments, or rate changes
    - Reviewing billing summaries before release
    - Pushing invoices to QuickBooks Desktop (On-Premise)
    - Generating invoices internally where required
    - Tracking invoice status and payment history
- This keeps financial operations aligned with approvals.

Internal Support & Communication Management

(Admins have complete oversight of internal employee communications.)

- This includes:
    - Viewing all employee support requests
    - Accessing private employee conversations
    - Tracking ticket status (open, in progress, resolved)
    - Assigning tickets internally to team members
    - Responding directly within the platform
    - Adding internal notes (admin-only visibility)
- Clients do not have access to this area.

Notifications & System Controls

(Admins can manage system communication behavior.)

- Capabilities include:
    - Triggering platform-wide notifications
    - Sending targeted alerts to specific clients
    - Sending approval and payroll reminders
    - Controlling automated notification settings
    - Monitoring alert effectiveness

- This allows proactive operational management.

Monitoring Integration Management (Teramind)

(Admins control and maintain the monitoring integration.)

- Admins can:
  - Configure Teramind integration settings
  - Map employees to monitoring accounts
  - Control data visibility permissions
  - Troubleshoot synchronization issues
  - Ensure monitoring data is accurately reflected in client views

Audit Logs & Activity History

(For accountability and compliance, admins have access to detailed audit records.)

- Logs include:
  - Login activity (employees, clients, admins)
  - Time record changes and approvals
  - Availability and leave actions
  - Additional work approvals
  - Payroll and billing actions
  - Support interactions
- Every significant action within the system is fully traceable.

WEB3 INDIA™

PHASES

The platform will be delivered in **three structured phases**, ensuring operational stability first, followed by approvals & billing, and finally advanced controls, integrations, and governance.

PHASE 1 – Core Workforce Operations & Visibility

Foundation Release (MVP – Operational Readiness)

This phase establishes secure access, workforce visibility, and time tracking **without any monitoring integration**.

1. Client Side Portal – Workforce Visibility

Objective: Provide real-time visibility into assigned employees.

Features Included:

- Secure client login & authentication
- Password recovery
- Session timeout and security enforcement
- Responsive design for desktop and modern devices
- Client dashboard displaying:
    - All assigned employees
    - Employees currently in active work sessions
    - Session start times
    - Live work duration
    - Items requiring attention (non-monitoring related)
- Live workforce view:
    - Employee name & profile photo
    - Current work status (working, on break, logged out)
    - Session start time

    - Live active duration

2. Employee Side Portal – Daily Work Environment

Objective: Enable structured work sessions and schedule clarity.

Features Included:

- Secure employee login & authentication
- Session controls to prevent parallel logins
- Automatic logout on inactivity
- Clock In / Clock Out functionality
- Live work timer and break tracking (where applicable)
- Work session interface displaying:
    - Current system time
    - Assigned shift details
    - Arrival status indicator
- Schedule visibility:
    - Daily and weekly schedules
    - Notifications for schedule changes
- Work records & time history:
    - Logged sessions
    - Approved work hours
    - Adjusted or rejected entries with explanations

3. Admin & Management Portal – Operational Control

Objective: Centralized administration and real-time operational oversight.

Features Included:

- Secure admin login (separate environment)
- Role-based access control
- Operations dashboard showing:
  - Active employees and clients
  - Employees currently working
  - Pending approvals
  - Open support tickets
- Employee administration:
  - Employee profile management
  - Client assignments
  - Schedule visibility
  - Access activation/deactivation
- Client administration:
  - Client account creation
  - Employee assignment to clients
  - Basic client rule configuration

WEB3.INDIA™

PHASE 2 – Approvals, Requests & Payroll Readiness

Process Control & Validation Phase

This phase introduces approval workflows and payroll validation **without monitoring data**.

1. Client Side Portal – Approvals & Confirmations

Features Included:

- Review daily and weekly work records
- Approve or decline submitted time
- Modify time entries with mandatory justification
- Approve or reject:
    - Additional work (overtime)
    - Unconfirmed work time
- Review and approve Hello Team adjustments
- Alerts & notifications:
    - Pending approvals
    - Additional work requests
    - Unconfirmed hours approaching payroll cutoff
    - Payroll deadline reminders
- Alerts persist until action is taken

2. Employee Side Portal – Availability & Leave

Features Included:

- Availability and leave requests governed by client rules
- Unpaid availability requests with notice guidance
- Paid leave options (where applicable):

    - Fixed, accrued, milestone-based, or none
- Automatic leave balance tracking
- Prevention of requests exceeding entitlement
- Approval flow:
  Employee → Client → Hello Team

3. Admin Portal – Time, Policy & Payroll Oversight

Features Included:

- Time record adjustments with full audit trail
- Mandatory notes for all manual changes
- Client re-approval required before payroll impact
- Availability & leave policy management per client
- Additional work oversight:
    - Pending, approved, rejected, and unbilled overtime
- Payroll readiness controls:
    - Review payroll-ready hours
    - Identify unapproved or disputed time
    - Enforce payroll cutoffs

WEB3.INDIA™

PHASE 3 – Billing, Monitoring Integrations & Governance

Financial Automation & Advanced Controls

This phase introduces **Teramind monitoring**, billing automation, accounting integrations, and compliance governance.

1. Monitoring Integration (Teramind)

Admin-Controlled Integration

Capabilities Include:

- Configuration of Teramind integration
- Employee-to-monitoring account mapping
- Permission and visibility controls
- Synchronization monitoring and issue handling
- Ensuring accurate reflection of monitoring status in the platform

Client Visibility

- Productivity summaries
- Activity timelines
- Online / offline patterns
- Screenshots (where enabled)
- Direct links to Teramind employee views

2. Billing & Invoice Management

Client & Admin Capabilities:

- Invoice generation based on approved work time
- Invoice history and PDF downloads
- Approved work summaries

- Bonus and rate adjustment approvals
- Payment history tracking
- Secure payment method storage
- Automatic weekly billing
- QuickBooks integration:
    - Push invoices to QuickBooks, or
    - Generate invoices internally with accounting sync

3. Payroll Validation & System Governance

Features Included:

- Final payroll validation before processing
- Override payroll dates (admin-controlled)
- Prevention of unapproved time processing
- Internal support & communication management:
    - Employee support tickets
    - Internal messaging
    - Ticket assignment and resolution
- Notifications & system controls:
    - Platform-wide alerts
    - Client-specific reminders
- Audit logs & activity history:
    - Login events
    - Time record changes
    - Approvals

- Leave and availability actions
- Payroll and billing activities
- Support interactions

WEB3.INDIA™

OUT OF SCOPE

- Mobile applications (iOS / Android)
- Multi-language support
- Advanced compliance requirements (HIPAA, SOC 2, etc.)
- Third-party license or subscription costs (Teramind, payment gateways, etc.)
- Data migration from existing or legacy systems

CHANGE MANAGEMENT

Any changes or additions beyond the agreed scope will be handled through a formal Change Request process, including:

- Scope impact
- Timeline impact
- Cost impact

Development will proceed only after mutual agreement and written approval.

HELLO TEAM RESPOSIBILITIES

- Timely feedback and approvals
- Access to Teramind APIs and related documentation
- Provision of branding assets (logos, colors, brand guidelines)
- Designation of a single point of contact

GENERAL TERMS AND CONDITIONS

- The client is responsible for providing a server for deployment. However, our technical team will deploy a test and staging server for development and testing purposes.
- Any paid API or third-party API required for real-time data retrieval must be provided by the client. Our team will facilitate the integration of these APIs into the platform as per project requirements.
- Any additional requirements not specified in this Proposal will be quoted separately. The client will be notified of the cost and timeline associated with such requirements before proceeding with implementation.
- Our team will implement standard security features within the platform to safeguard user data and ensure secure transactions. These security measures will be in accordance with industry best practices and standards.
- All intellectual property rights associated with the deliverables, including but not limited to code, designs, and documentation, shall belong to the client upon final payment, unless otherwise specified in the contract agreement.
- This Proposal, together with any attachments or exhibits, constitutes the entire agreement between the parties regarding the subject matter herein and supersedes all prior or contemporaneous agreements and understandings, whether oral or written.

LEARN ABOUT US

Web 3.0 India is a frontrunner in the dynamic world of Web3 development, serving as a core unit of Virtual Height IT Services Pvt. Ltd. established in 2010.

Our team of over 180+ skilled professionals brings a wealth of experience to the table, having delivered over 1200+ successful projects across 11+ countries for more than 15 years. We empower businesses with cutting-edge Web 3 technologies and services, including:

- Crypto Wallet Development
- Crypto Exchange Development
- ICO, Presale or Token Launchpad Creation
- KYC Verification Integration Services
- NFT Store and Marketplace Development
- Social Media Development
- P2P Platform Development
- Layer 1 and Layer 2 Solutions
- DeFi Development
- Smart Contract Development
- Metaverse Development
- AI Development
- Web and Mobile App Development
- Game Development

Web 3.0 India has worked and delivered the projects for various well known and highly reputed clients like **GTPL**, **News Capital**, **Connplex**, **Moviemax**, **Plutope, Indian Archery, PPRC, Doordarshan, Quinable, TransferNTour, NyBestMedicals,** and much more.

We have been recognised among the Top 5 Blockchain Development Companies in India by CIOLOOK India, and also awarded with The Best Mobile Application Development Company Award by Pride of Nation and The Best Gaming Product Solution Company Award and Best Blockchain Development Company Award by GESIA.

Virtual Height IT Services Pvt. Ltd. (Parent company of Web 3.0 India) has expanded its expertise beyond IT development services to encompass other verticals like Digital Marketing (Target 8 Sales), Placement Services (Job In Gujarat), and Skill Training (Ahmedabad Computer Education) that complement their core offerings:

TARGET 8 SALES

JOB IN GUJARAT

Ahmedabad™ Computer Education
ISO 9001:2015, ISO/IEC 27001:2013 & CMMI - 3 Certified

WHAT DEFINES US?

Technical Expertise:

Web 3.0 India excels in mobile app and web app development, possessing a rich array of technical proficiencies across various frameworks and technologies essential for crafting cutting-edge solutions. Our expertise spans multiple platforms, including React Native, Flutter, and more, ensuring versatile and high-performance mobile app development. For web applications, we harness the power of modern technologies such as React.js, Angular, Vue.js, and others to deliver seamless user experiences across different devices and browsers.

Proven Track Record:

We have a proven track record of delivering successful projects across diverse domains within mobile and web app development. Our portfolio encompasses a wide range of applications, including but not limited to e-commerce platforms, social networking apps, on-demand services, fintech solutions, healthcare applications, educational platforms, and more. We specialize in creating feature-rich, scalable, and secure applications tailored to meet the unique requirements of our clients. With our expertise in frontend and backend development, as well as database management systems, we ensure robust and reliable solutions that drive business growth and user engagement.

Will and Attitude to Deliver:

At Web 3.0 India, our defining characteristic lies in our unwavering commitment to deliver excellence, fueled by a strong will and a proactive attitude. Anchored by a client-centric approach, we prioritize understanding our clients' needs deeply. With a relentless drive for innovation and a dedication to exceeding expectations, we embody a culture of proactive problem-solving and continuous improvement, empowering us to consistently deliver results that truly resonate with our clients.

Maintenance and Support:

Web 3.0 India specializes in offering comprehensive ongoing and post-maintenance support services to ensure the long-term success and smooth operation of our client's requirements.

WHY WE'RE YOUR BEST CHOICE?

- 1200+ Projects Completed
- Global Network over 11+ Countries
- Custom Solution Services
- Multinational Presence
- 350+ Diversified Clients
- 85% Client Retention Ratio
- 14+ Years of Diverse Experience
- CIOLOOK Best Blockchain Company Certified
- Best Gaming Product Solution Company Award by GESIA
- Best Mobile Application Development Company Award by Pride of Nation
- Adherence to High Quality Standards
- Client-Centric Approach
- Suggestions for Client's Benefit
- Value-Driven Solutions
- Attention to Detail
- Passion for Innovation

THANK YOU

We would like to express our sincere gratitude for considering our Proposal for the development of a Hello Team Workforce Hub platform. We appreciate the opportunity to present our vision and expertise in this exciting and rapidly evolving field. Should you have any questions, require further clarification, or wish to discuss the Proposal in more detail, please do not hesitate to contact us. We look forward to the possibility of collaborating with you and bringing your project to fruition.

GET IN TOUCH

For inquiries, queries, collaboration opportunities, or to schedule a consultation, please contact us at the following:

Email: hello@web30india.com

Phone: +91 95109 87700 (India) OR +44 20 3290 7090 (UK)

Website: www.web30india.com

Our dedicated team is ready to assist you with any aspect of the Proposal or address any queries you may have. Thank you once again for your time and consideration. We eagerly anticipate the opportunity to work together and contribute to the success of your project.
